

Medical Electronic Attachment, Inc. Partners with Peak Performance Solutions, Inc. to Offer Electronic Medical Attachments for the Property & Casualty Industry

Atlanta, April 30, 2008 – Medical Electronic Attachment, Inc. (MEA) and Peak Performance Solutions, Inc. of Columbus, OH announced today they have entered into a partnership to provide Peak Performance WCIRS clients the ability to receive and process electronic Medical attachments from their Providers. Through this agreement WCIRS will now offer an electronic repository of medical bill attachments as a front-end solution for the payor and provider markets.

MEA's FastAttach™ system enables healthcare offices the ability to transmit healthcare attachments – including vision, workers compensation attachments, professional and institutional attachments, and other documents required to process claims – to MEA's repository, where Payors will be able to view them. FastAttach™ provides secure HIPAA compliant attachment processing and reduces administrative, mailroom and storage costs.

"Electronic attachments through our FastAttach™ program streamlines the process for Payors and Providers," said Thomas Hughes, President of MEA. "Adopting this technology is a nice fit with our ongoing commitment to the healthcare community to enhance our product offerings and improve revenue management."

About Medical Electronic Attachment, Inc.

MEA, is The Recognized Leader In Electronic Attachments. MEA offers systems designed to make insurance attachment submissions and processing as easy as possible for the Patient, the Provider and the Payor. After processing millions of electronic attachments, MEA's knowledge of the attachment industry is recognized by healthcare experts throughout the country. For more information on how to use the MEA FastAttach system, visit the MEA Web site at www.mea-fast.com

About Peak Performance

Founded in 2004, Peak Performance offers a comprehensive insurance processing solution for Property & Casualty insurance organizations and risk management solutions that deliver measurable and significant ROI, from reducing operating costs to improving loss ratios. Peak's unique approach combines mature and proven software solutions with web services and other modern technologies to redefine end-to-end processing. Others look to end-to-end as little more than automating processes from policy and claims, while we extend the definition to include streamlining processes throughout the entire operation. For more information on Peak Performance's products and services, visit www.peakpsi.com.
