

Medical Electronic Attachment, Inc. and ClaimLogic announce strategic relationship

Atlanta, GA, July 17, 2008 — Medical Electronic Attachment, Inc. (MEA), The Recognized Leader In Electronic Attachments and ClaimLogic, an Industry leader in EDI and Revenue Cycle Management products and services to many of the largest medical provider groups in the US, today announced they have entered into an alliance that will allow ClaimLogic to offer its clients FastAttach™, a streamlined electronic medical attachment solution.

MEA's FastAttach™ system enables healthcare offices to transmit healthcare attachments – including vision, workers compensation, professional and institutional attachments, and other documents required to process claims – to MEA's repository, where payors will be able to view them. FastAttach™ offers a secure and reliable method to submit all documents required to support a claim. FastAttach™ is the most efficient paperless process for sending attachments; it reduces postage costs, eliminates lost attachments and improves revenue cycles.

"Our front-end electronic attachment solution will help to enhance ClaimLogic's browser-based claims management product and will vastly improve their clients' revenue cycle management," said Tom Hughes, CEO of MEA. "We are delighted to be working with ClaimLogic and look forward to offering our services to their broad range of providers."

"I am always looking for ways to increase productivity and decrease costs for our clients, and MEA FastAttach™ is a proven value added service that we look forward to implementing with our base of large Medical providers" says Tom Davis, VP, Sales and Marketing of ClaimLogic.

About ClaimLogic

ClaimLogic is an Industry leader in providing EDI and Revenue Cycle Management products and services to the healthcare industry, specifically in the physician based medical market. With over 100,000 users of their products and services, including many of the largest Physician Groups and Medical Centers in the US, ClaimLogic provides web native applications that are focused on improving the operational efficiencies and profitability for providers of healthcare services. These products include full service EDI transaction sets and claims processing tools for all payers, industry leading denial management standards and reporting tools, real time and batch patient eligibility, patient statements, paper claims and attachment processing, secondary claims processing and many other cost effective ancillary products and services geared to enhancing the revenue cycles for Medical based providers.
